

Breast & Imaging Center  
at **SAN ANTONIO** COMMUNITY HOSPITAL

## *The Women's Breast & Imaging Center at San Antonio Community Hospital*

The journey to achieving and maintaining breast health can be different for every woman. Prevention starts with personal choices – such as staying physically active, eating right, and getting annual mammograms beginning at age 40.

The Women's Breast & Imaging Center offers advanced breast imaging and minimally invasive diagnostic procedures in an atmosphere of comfort and support. Evening and lunchtime appointments are available to accommodate the busiest schedules. And, should the need arise, the center provides a nurse navigator who serves as an advocate to answer your questions and to assist with the coordination of follow-up care on an individualized basis.

### Comprehensive services include:

- Screening and diagnostic digital mammography
- Breast Ultrasound
- Minimally invasive biopsy procedures using ultrasound or stereotactic guidance
- Assisting your physician with referrals to specialists, as needed
- Support services and educational resources

Unparalleled breast care focused solely on you.

Ask your doctor for a referral.
